EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kris Cappel on 10/27/06.

The application has been amended as follows:

31. (Currently Amended) A method for monitoring a bi-directional communication path, the method comprising:

establishing a bridging connection from a bi-directional communication path through an interface section to an interface output connection;

providing an impedance boosting section coupled to the interface output connection, the impedance boosting circuit including a transformer tap output; and providing an access connection point to the access point tap output,

wherein providing an impedance boosting section comprises providing a transformer winding with a winding tap, and further wherein providing a transformer winding comprises providing a transformer winding with N_1 turns above the winding tap and N_2 turns below the winding tap, where $N_1 \leq N_2$.

39. (Currently Amended) A bi-directional access point according to claim 22 37, wherein the impedance boost is commensurate with a tap value of -20dB.

The following is an examiner's statement of reasons for allowance: With regards to claims 25-28 and 31-34, the prior art of record does not disclose or fairly teach the transformer winding comprising N1 turns above the winding tap and N2 turns below the winding tap, where $N1 > N2$. With regards to claims 29, 30 and 35, the prior art of record does not disclose or fairly teach the interface section being a resistive interface section. With regards to claim 36, the prior art of record does not disclose or fairly teach the impedance boosting means including a transformer winding with a winding tap. With regards to claims 37-39, the prior art of record does not disclose or fairly teach the impedance boost is commensurate with a preselected tap value ranging between -10dB and -30dB.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kimberly E. Glenn whose telephone number is (571)-272-1761. The examiner can normally be reached on Monday-Friday 7:30 to 4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pascal can be reached on (571)-272-1769. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
